DIRECTORATE GENERAL HEALTH SERVICES, PUNJAB

Weekly Feedback Report DHIS-II (6th September - 12th September, 2021)

Tel: [+92-99200990 e-mail: hmis.pb@yahoo.com

Summary:

In this report, different indicators of health facility are discussed. The data of teaching/tertiary care hospitals is also included. The detailed analysis of week 36 of year 2021 are being presented in this report. The reporting regularity of the district Bahawalnagar, Jhelum, Layyah, Rawalpindi and district Rahimyar Khan has accurate reporting compliance targets for the week 36 of year 2021. District D.G. Khan, Kasur, Muzaffargarh, Okara, Pakpattan and Bhakkar did not meet the reporting compliance targets completely. District Bhakkar, Layyah and Rajanpur are recently shifted on DHIS-II software, that is why there reporting compliance is below the target.

. The total OPD Visits during week 36 of 2021 was 631.4K out of which 197.4k were reported in BHU(all), 115.5k were reported in RHC (all), 90.4k were reported in DHQ (all), 143.4k were reported in THQ(all) and 84.7k were reported in Teaching hospitals.

On average, 42 OPD per day visits were reported in BHU's, 177 per day visits were reported in RHC's, 2512 per day visits were reported in DHQ hospitals, 664 per day OPD visits were reported in THQ hospitals and 2352 OPD per day visits were reported in Teaching Hospitals. It is calculated as total OPD visits by dividing the number of reporting health facilities and the total number of days excluding Sunday.

Fifty-three diseases are reported through DHIS, out of which eleven prone Epidemic diseases of 12 districts of Punjab on which DHIS-2 is implemented successfully, have been discussed in this report through DHIS-2 software.

Antenatal care coverage is an indicator of access and utilization of health care services during pregnancy.

During week 36, the overall ANC-1 reported coverage in 12 districts of Punjab was 21,090 of the total expected population (3.4%). On average, the highest number of visits of ANC-1 has been recorded in district Rahimyar Khan and under the health facility BHU i.e. 1639 visits.

Delivery coverage at health facility is an indicator of utilization of delivery services provided at public health facilities. The overall percentage of deliveries conducted in health facilities of 12 districts of Punjab. During week 36 the highest (27%) C-section cases has reported in district Rawalpindi and the highest cases (98%) of normal delivery cases were reported in district Rajanpur and Kasur. Likewise, the highest per day C-section has recorded in district Rawalpindi under the health facility teaching hospitals and highest per day normal deliveries were conducted in district Rahimyar Khan under the health facility BHU.

Indoor patient's data of week 36 has shown in (fig. 8 & fig. 9) which cleared the statistics of indoor admissions and death.

During week 36, family planning visits reported from the public health facilities against the expected population were 10,153. The highest number of FP visits were reported in district Rajanpur (72%) under the health facility Basic Health Unit.

DHIS-II WEEKLY REPORTING COMPLIANCE PUNJAB, WEEK 36

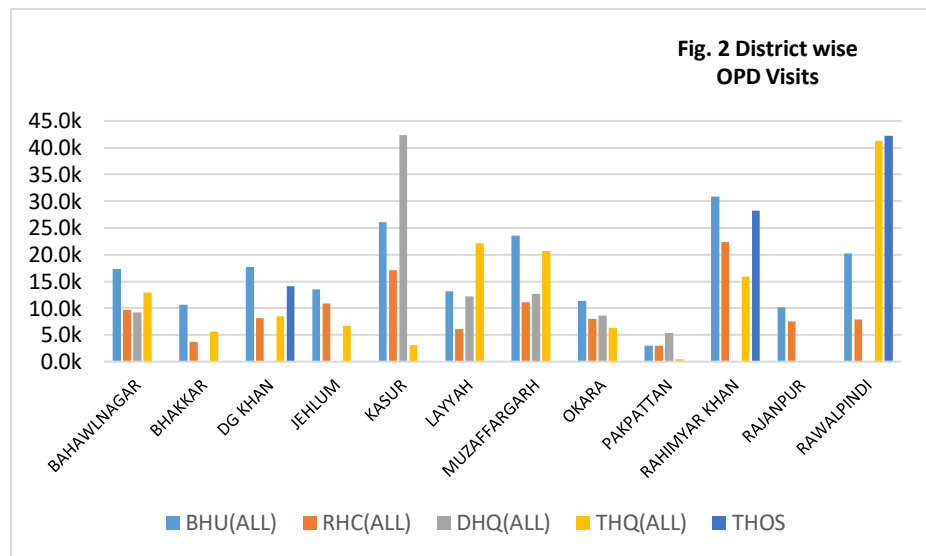

Reporting compliance showed that how timely and regularly the concerned 12 districts of Punjab are reporting data to meet the data targets.

In DHIS-2, we have three daily basis reporting forms to which concerned districts enter the data on daily basis and else three monthly basis forms at which they enter the data on monthly basis as well. The target for reporting compliance is 100% and it can be seen that from fig. 1, the reporting regularity of the district Bahawalnagar, Jhelum, Rawalpindi, Layyah and district Rahimyar Khan has accurate reporting compliance targets for the week 36. District D.G. Khan Bhakkar, Kasur, Muzaffargarh, Okara, Pakpattan and Rajanpur did not meet the reporting compliance targets completely.

Reported Patients Through OPD in Health Facility, Week 36

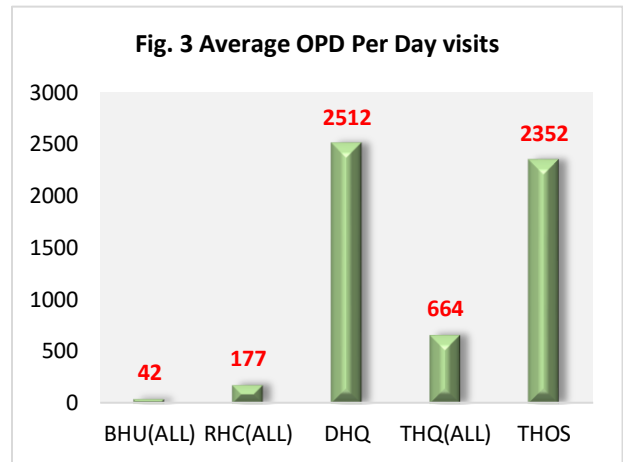

In figure 2, the total OPD Visits during week 36 of year 2021 has displayed through bar chart. The total OPD Visits during week 36 of 2021 was reported as 631.4K out of which 197.4k were reported in BHU(all), 115.5k were reported in RHC (all), 90.4k were reported in DHQ (all), 143.4k were reported in THQ(all) and 84.7k were reported in Teaching hospitals. The health facilities that are showing zero OPD visits is because of they are

not reporting at daily basis on DHIS-2 software. The highest number of OPD visits were conducted in teaching hospital of district Rawalpindi and DHQ hospital Kasur during the period week 36 of year 2021.

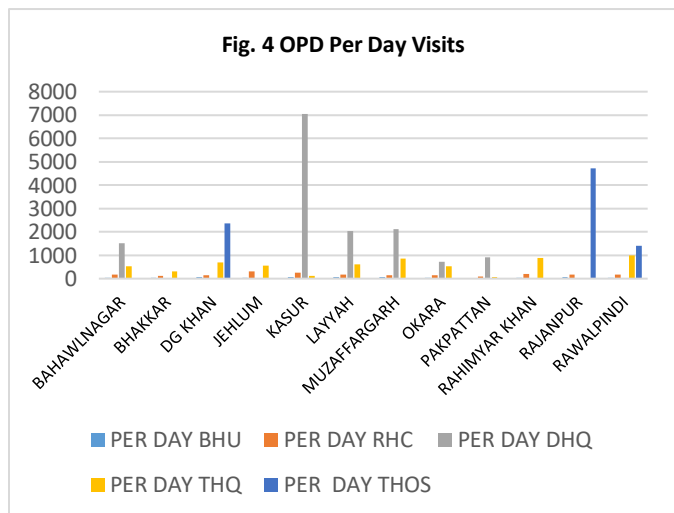

Average OPD Per Day Visits by Health Facility Wise:

Fig. 3 displayed the OPD per day visits by health facility. This is calculated as ratio between the total OPD visits in all 12 districts of Punjab reported in DHIS-2 software and reporting number of health facilities and then divided it to the 6 week days excluding Sunday. During week 36 of year 2021, 42 per day visits were reported in Basic Health Unit (BHU's), 177 per day visits per reported in Rural Health Care (RHC's), 2512 per day visits were reported in DHQ hospitals, 664 per day visits were reported in THQ hospitals and 2352 per day visits were reported in teaching hospitals. It is to be noted that, DHQ and THQ hospitals of Rajanpur, THQ Kasur and DHQ Jhelum are not reporting on daily basis at DHIS-2 Software for the health facility of DHQ, that is why, the average per day health facility is affected.

District Wise Average OPD Per Day Visits:

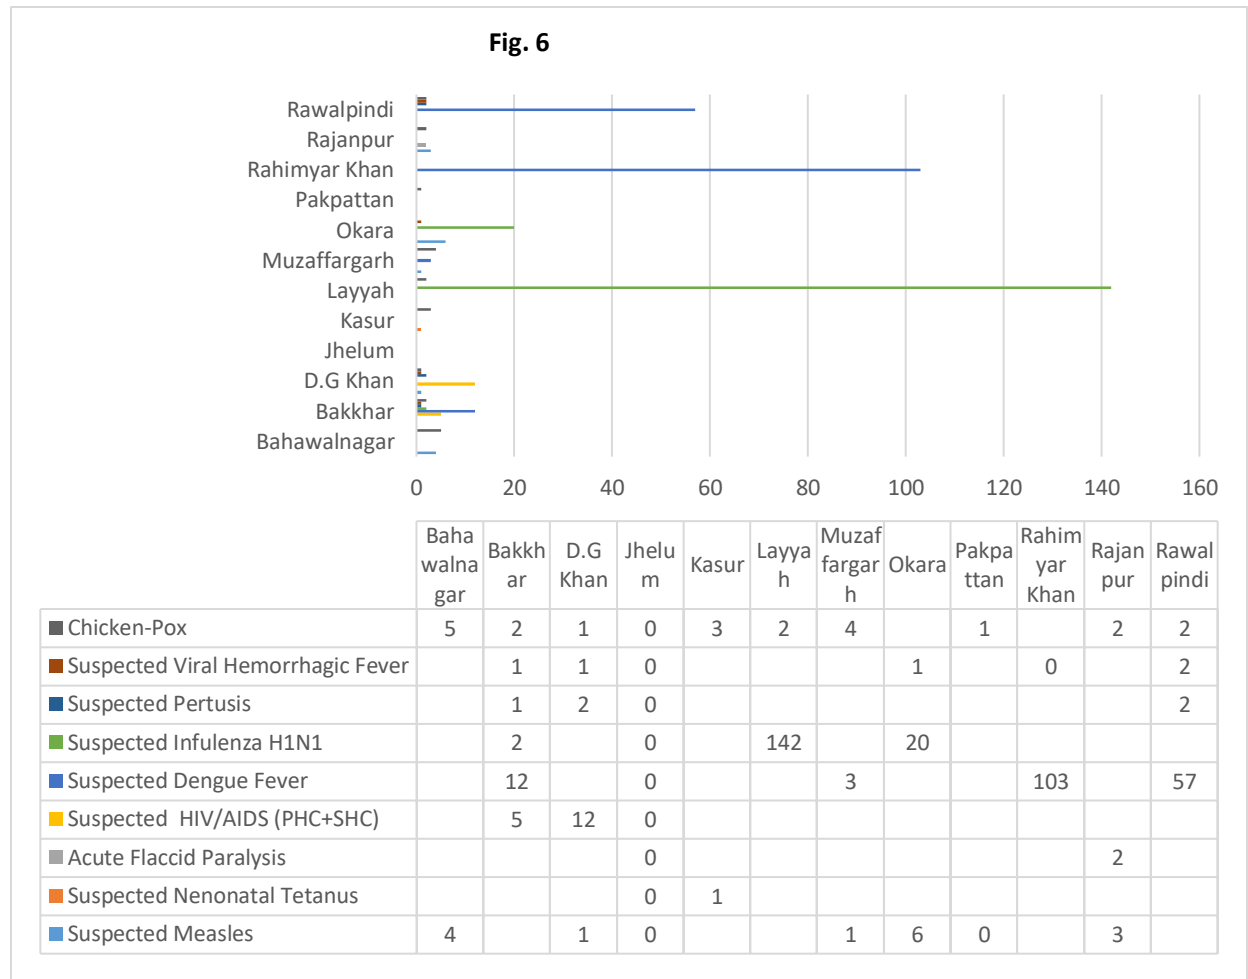

Fig. 4 represented the district wise OPD Visits by health facility wise. On average, the highest no. of OPD per day visits were reported in district Kasur under the health facility DHQ i.e. 7057 per day OPD visits during the week 36 of year 2021.

OPD Per Day Visits in Teaching Hospitals:

Fig. 5 displayed the OPD per day visits in teaching hospitals during the week 36 of year 2021. It can be seen that the highest no. of OPD visits were recorded in district Rahimyar Khan.

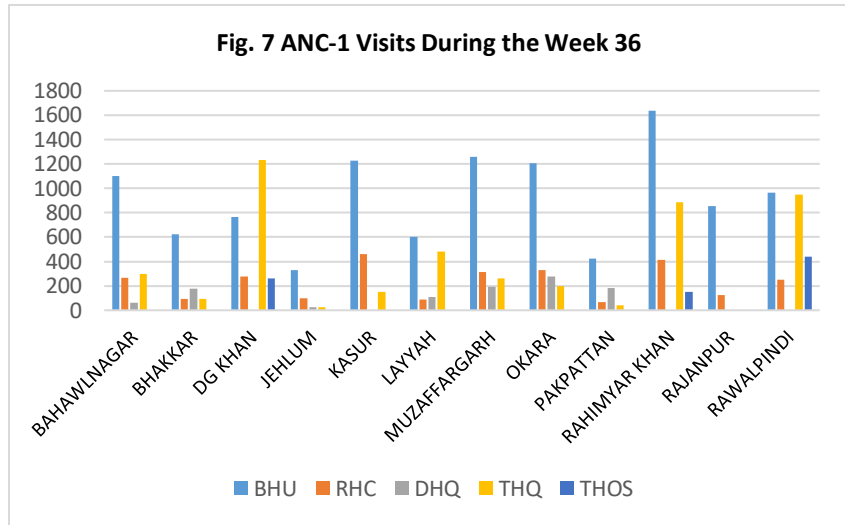

Prone Epidemic Diseases:

From Epidemic diseases, we mean that affects a large number of people within a community, population or region. In above figure 6, prone epidemic diseases status of 12 districts which are successfully implemented on dhis-2 software, shown through graph. According to the descriptive analysis, the highest number of cases for suspected measles has reported in district Okara. The highest number of suspected neonatal tetanus cases has reported in district Kasur. The highest Acute Flaccid Paralysis cases has found in district Rajanpur. The highest number of HIV/AIDS cases has reported from the district D.G Khan. District Rahimyar Khan has highest number of cases for suspected dengue fever. The highest number of cases for the disease Suspected Influenza H1N1 has reported in district Layyah. The highest number of chicken-pox cases has reported in District Bahawalnagar during the week 36 of year 2021.

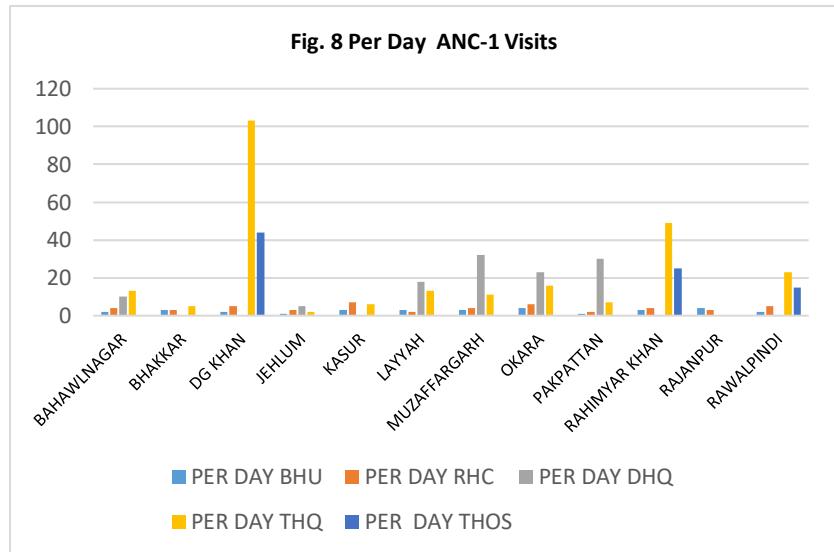

DHIS-II Weekly Reported ANC-1 Visits in Health Facility, Week 36

Fig. 7 showed the weekly basis visits of ANC-1 in all BHU's, RHC's, THQ's and Teaching Hospitals for the 12 reporting districts of Punjab in DHIS-2 Software. The highest number of visits of ANC-1 has been recorded in district Rahimyar Khan under the health facility of BHU i.e. 1639 visits during week 36.

Per Day ANC-1 Visits by Health Facility Wise:

Fig. 8 showed the per day Anc-1 visits by health facility wise during the week 36 of year 2021. The per day average of ANC-1 visits were calculated as the reported anc-1 visits in each health facility divided by the total functional health facilities in each district and then divide it to 6 days of week excluding

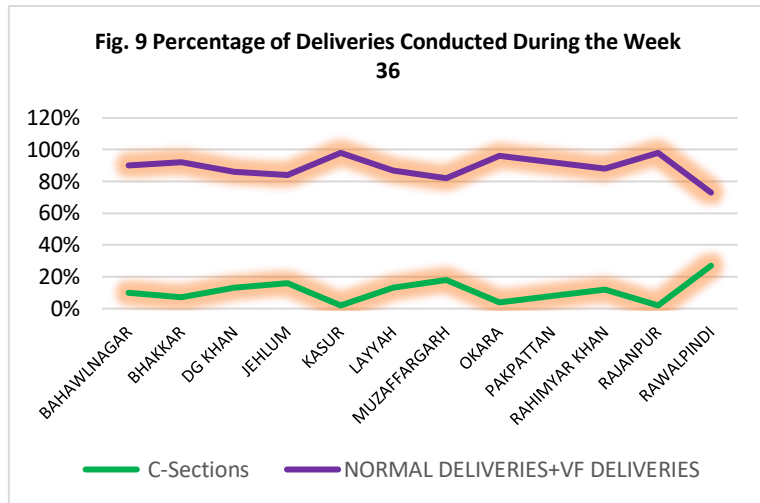

Sunday. The statistics showed that the highest per day ANC-1 visits have reported in district D.G Khan (103 per day visits) under the health facility THQ.

Deliveries Coverage at Health Facility:

The statistics of delivery coverage at health facility (fig. 9) of 12 district of Punjab showed that the highest number of C-section has reported in district Rawalpindi i.e. 27% C-section during the week 36 of year 2021 whereas the highest number of normal+ VF deliveries has reported in district Rajanpur (98%) and Kasur (98%) for the week 36 of year 2021.

These percentages were calculated as total C-section conducted and total normal deliveries conducted in each districts and divided by the total number of deliveries conducted in week 36 of year 2021.

District Kasur and Rajanpur is showing 0 C-section as their DHQ Rajanpur & THQ Kasur and Rajanpur Hospitals are not reporting on daily basis in DHIS-2 Software. Because of this, it visualized the discrepancy in data reported on DHIS-2.

Per Day C-section & Normal Deliveries Conducted:

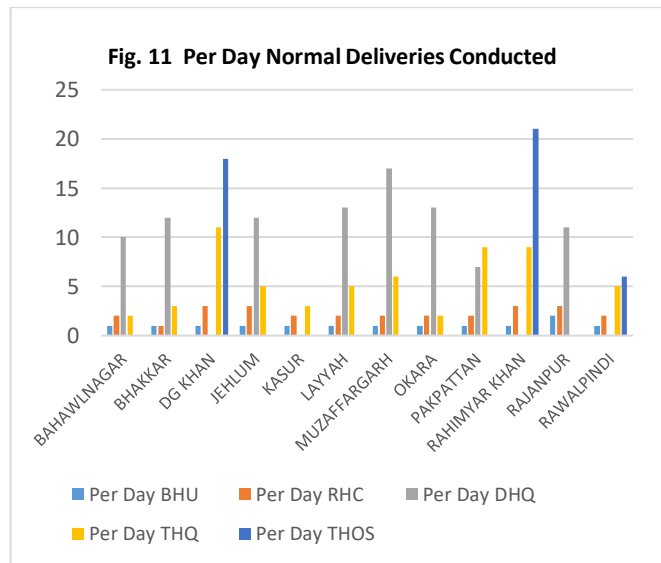

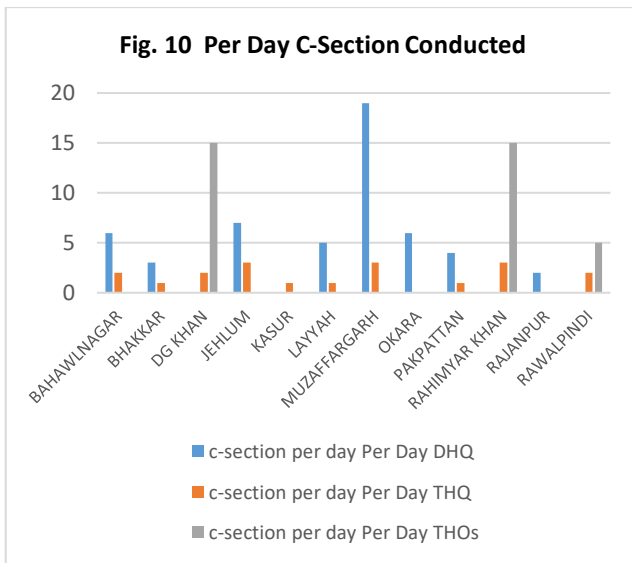

Fig. 10 & Fig. 11 visualized the per day C-section and normal deliveries conducted at the 12 districts of Punjab during the week 36 of year 2021. According the descriptive analysis of C-section, the highest number of C-section has recorded in district Rawalpindi under the health facility of teaching hospitals whereas the highest number of per day normal deliveries has reported in district Rahimyar khan under the health facility of BHU.

Total Number of Deliveries Conducted and PNC-1 Visits:

In Fig. 12, the comparison between the total Anc-1 visits reported with the number of PNC-1 visits and total number of deliveries in 12 districts of Punjab during the week 36 of year 2021 has shown through Fig. 12.

According to the data reported on dhis-2, the highest number of deliveries were reported in district Rahimyar Khan i.e. 1292 deliveries out of which 1292 PNC-1 visits and 3122 anc-1 visits were reported in week 36 of year 2021.

DHIS-II Weekly Reported Daily Indoor Patient (IPD), Week 35

Above Fig. 13 visualized the total admissions in Indoor and Fig. 14 represented the Indoor Total Deaths.

The highest number of indoor admissions were reported in districts Rahimyar Khan i.e. 7202 whereas the highest number of indoor total deaths has reported in district Rawalpindi i.e. 202 deaths during the week 36 of year 2021.

DHIS-II Weekly Family Planning Visits, Week 36

Fig. 15 exhibited the weekly FP visits by health facility wise. During week 36, the overall total FP visits were reported as 10,183 visits out of which the highest number of FP visits were recorded in BHU's i.e. 72% in district Rajanpur. These percentages were calculated as total FP visits in districts divided by the total FP visits by health facility wise reported during week 36 of year 2021.

Table: 1 Weekly Method-wise FP Clients

DISTRICT	COC cycles	Condom Pieces	DMPA Inj	IUCD	Implants	POP cycles	Tubal Ligation	Vasectomy
